

BUILDING OUR FUTURE WORKFORCE

Join a **technical advisory group** for influence, insight and engagement

Technical Advisory Groups and Committees

Technical advisory committees give builders, remodelers and others in our industry an opportunity to provide input and guidance to the education community at skills centers, community and technical colleges and universities.

Why should you join a Technical Advisory Committee?

Influence and Impact

- Influence important decisions and policies
- Provide input to shape the direction of the school, curriculum development and extracurricular activities
- Contribute to the overall improvement of the educational experience

Collaboration and Networking

- Collaborate and network with other individuals with a common interest in education
- Engage in meaningful discussions, exchange ideas, and learn from fellow group members
- Network and build relationships, personally and professionally

Learning and Professional Development

- Explore diverse perspectives and experiences
- Deepen your understanding of education-related topics, trends, and best practices
- Enhance your knowledge and skills in education and leadership

Community Engagement

- Actively engage with the school community
- Work on projects, initiatives, or events that promote community involvement, parent engagement, and student success
- Gain a sense of belonging
- Make a positive impact on the overall school culture

Advocacy and Representation

- Become a representative of the broader school community
- Advocate for the needs, concerns, and aspirations of students, parents, and other stakeholders
- Ensure that diverse perspectives are considered in decision-making processes and policies

Personal Satisfaction

- Contribute your time, knowledge, and skills to a cause that matters to you
- Make a positive impact on the education and well-being of students
- Gain a sense of purpose and accomplishment

What's expected of you?

Active Participation, Commitment and Accountability

- Actively engage in meetings, discussions, and activities related to the advisory group's objectives
- Attend meetings regularly
- Be prepared by reviewing relevant materials and completing assigned activities
- Contribute to discussions by sharing insights, perspectives and ideas
- Know your involvement and input are valuable

Expertise and Knowledge

- Bring expertise, knowledge, or experience in a specific area
- Share valuable insights and recommendations
- Provide guidance on industry-specific issues

Objective and Constructive Feedback

- Provide objective and constructive feedback in a respectful manner to improve the learning environment
- Review and give input on policies, programs, initiatives, or strategies

Collaboration and Teamwork

- Actively listen to others
- Consider different perspectives
- Find common ground to reach consensus or make recommendations

Confidentiality and Trust

- Respect sensitive information or discussions requiring confidentiality
- Maintain a high level of trust within the group
- Ensure a safe environment for open and honest dialogue

Representing Stakeholders

- Represent the interests and perspectives of the residential construction industry
- Keep industry issues in mind when participating in discussions and decision-making processes

How to get involved?
